INDIVIDUAL REFLECTION ON ASSIGNMENT 1

SECTION:06-SECJH

COURSE NAME: BACHELOR OF COMPUTER SCIENCE – SOFTWARE
ENGINEERING

LECTURER’S NAME: TS. DR. SARINA BINTI SULAIMAN

GROUP: 2- JELLYBEAN

DATE OF SUBMISSION: 30 DECEMBER 2023

NO.	NAME	MATRIC NUMBER
1	TAN SHEAU JUN	A22EC8001

I am very grateful to have the opportunity to visit the New Academia Learning Innovation Nali 2023 event. In the 2023 event, there are many posters that implied a lot. One of the posters that attracted me the most was "Online Education by Thai Mooc," and it was related to information and communication technology (ICT) in teaching and learning. This Thai Mooc education can be joined by everyone from all over the world, and it is free. Students can join this Thai Mooc education to gain extra knowledge during their free time because Thai Mooc will provide a recorded video of their learning. I think this is beneficial to me because I am too busy studying and doing the assignment to have time to learn other things outside of the knowledge I learn in the lesson. If I join this Thai Mooc education, I can watch the recorded video that is provided by Thai Mooc education during my free time to gain extra knowledge in the ICT field. Thai Mooc is not only good for study but also for a career because we can shift toward that field by studying these free courses and online courses in Thai Mooc education if we want to change the field or work.

I suggested Thai Mooc Education can conduct physical classes for people that are more interested in their lesson. This is because physical education lets people be more concentrated on learning, make new friends from different countries, and communicate with each other. Otherwise, Thai Mooc Education can also conduct a party every month so that students can recognize each other and take a break from the busyness.
