SECTION:06-SECJH

COURSE NAME: BACHELOR OF COMPUTER SCIENCE – SOFTWARE ENGINEERING

LECTURER'S NAME: TS. DR. SARINA BINTI SULAIMAN

GROUP: 2- JELLYBEAN

DATE OF SUBMISSION: 6 DECEMBER 2024

NO.	NAME	MATRIC NUMBER
1	TAN SHEAU JUN	A22EC8001

In the PC assemble lab, I learned how to assemble and disassemble the PC that followed those steps, which were taught by the lab technician. It was very fun because I had to cooperate with my group members to assemble and disassemble the PC. I also understand the components inside the PC and their storage. Although our group is not the winner, all of us enjoyed doing the lab together. After that, we have a test related to the PC assembly that we did just now. I think this test helped me better understand the steps and the components inside the PC because I had to think about the steps that I took before assembling the PC. I hope that this kind of lab can continue to be conducted because we are enjoying learning new things and will not feel bored.
